Foreign Affairs.com, January 29, 2024

Stephen Biddle, Professor of International and Public Affairs at Columbia University’s School of International and Public Affairs and Adjunct Senior Fellow for Defense Policy at the Council on Foreign Relations

コメント：一読の価値あり、筆者の結語：If quality can ensure quick, decisive victories, the traditional U.S. approach is sound. But if the lesson of Ukraine’s 2023 offensive, in light of past experience, is that deep and well-prepared defenses remain robust, as they have been for the last century, then quality alone may not be enough to ensure the kind of short wars of quick decisive breakthroughs that U.S. defense planning has long tended to presuppose. Quality is necessary for opportunity but may be insufficient in itself for success. And if so, the United States may need to rethink its balance of quality and quantity in a world where permissive conditions happen sometimes but cannot be guaranteed.
