

# What should We Do Together to Defend against the China's Invasion?

June 25, 2022

Dr. Yano Yoshiaki

# Why should we cooperate one another?

- CCP calls the Senkaku Islands “ Their Core Interests” as well as Taiwan.
- CCP also ordered their Total Armed Forces, including the PLA, the PAP and its subordinating command, the China Coast Guard Bureau and the Militia, to recapture these core interests to accomplish its final unification of their farther land.
- This means the security of the Senkaku Islands is inevitably unified with that of Taiwan. This leads the need of the close security mutual cooperation between Japan and Taiwan.

# When Will the U.S. Forces be back?

- Change of the Military Balance of Power in the Western Pacific Region: The balance of the nuclear as well as the conventional power has already changed in favor of China as the result of the drastic increase of the military expenditure of CCP.
- The A2/AD strategy has hinder the advance of the U.S. CSGs in the western Pacific Ocean and reject them to enter into the East and South China Sea without the submarines.
- Japan as well as Taiwan should resist to the China's invasion by ourselves for more than half and one month under the threat of North Korea and Russia in the worst case.
- If so, the need of the cooperation between Japan and Taiwan has become more important than in the past.

# The China's Capability of the Invasion

- Total Force: about 400,000 members, composed of 5 Army Gps. Mar C & ABN Army
- Deployed Anti-Surface Missiles: more than 400 units including those on the vessels
- Fighters: currently deployed are about 200, capable of 1,000 deployed in the 11 airbases
- Deployed Anti-Air Missiles: S-400PMU2(range of 200km), S-400 will be probably deployed, covering the whole of Taiwan Strait
- Landing Force: more than 21,700 members & 1,100 amphibious vehicles, capable of increasing to 36,000 mem. & 1,500 amphis.

# The China's Capability of the Invasion

- Airlift: China can transport more than 5,600 personnel and 110 tanks by the PLAAF, and 22,500 personnel by 1,000 civilian aircrafts by mobilizing the civilian airlift capabilities.
- Sealift: China can transport 1,000 personnel by the 30 helicopters and 3 hovercrafts on the type 075 amphibious assault vessel. China can also increase its sealift capability by using the mobilized civilian role on-role off ships.
- If China get a sea port or an air port, they will be able to increase their invasion forces dramatically faster and easier.
- They will emphasize on capturing the political and economical centers in the large cities to urge the surrender.

# The Phases before the Invasion

- 1<sup>st</sup> Phase: Political, Economical & Psychological Pressure
- 2<sup>nd</sup> Phase: Military Operation Other Than War
- Xi Jin-ping signed the “The Tentative Principles of the Military Operation Other Than War” activated on June 15, 2022, probably strengthening the anti-terror operations, border guard and the civilian security.
- 3<sup>rd</sup> Phase: Restricted Invasion to the Small Islands of Taiwan and/or the Senkaku Islands of Japan
- 4<sup>th</sup> Phase: Large scale cyber and missile attacks with the SF attacks, and the surprise against the satellites in the space

# How will Occur the Invasion?

- Occurrence of the simultaneous or continuous invasion against Taiwan and the Southwestern Islands of Japan(including Okinawa, Miyako, Ishigaki and Yonaguni Islands) would be the most probable,
- Because of the strategic unification of the both regions, those need the mutual support of missile firepower to defend the PLA's invasion trying to get through the Miyako Strait.
- The invasion will occur in from 2 to 5 years earliest, when the military power would be at the peak,
- or until 2035 at the latest, when the construction of their modernized their own Socialism Society will be basically accomplished.

# What should we do together to defend?

- Mutual exchange of the Information in the peacetime
- To establish the mutual communication network and the organization between the two governments including the military.
- Mutual coordination of the emergency plans
- Conduct of the trilateral exercises including the U.S. Forces
- In the emergency, we should coordinate more closely one another the firing zones of the SSMs, ASMs, AAMs and the covering area of the radars and other intelligence collecting methods.
- We should exchange the information about the cyber attacks, the missile deployments, the SF activities, including the space and electro-magnetic domains.

# How to Cooperate in the War Time?

- NEO Operations: Before and during the war, the civilians of the both countries should be assured their safety and safely evacuated to the place of refugee.
- Mutual Support in the Logistics: We should support one another in the supply of the equipment, the ammunition including the missiles, as well as the strategic air and sea lift including the escort and guard of the transportation.
- Mutual Support of the Firings: We should coordinate the mutual support firing zones and the naval/aerial operational areas automatically through the linked network system.
